

Forensic Statement Analysis

~The key in deception detection~

July 19, 2018

Forensic Statement Analysis is a tool that is highly effective in the detection of deception hidden in a person’s written or spoken statement.

Attendees will discover techniques of critically examining the word choice, structure, and content of a person’s statement to determine:  or Deception?

\$149

Research by experts in the fields of language, psychology and deception detection has led to the identification of these trends in language that are referred to as "linguistic signals". Using Forensic Statement Analysis (series of layered techniques) you will identify these linguistic signals that differentiate deceptive statements from truthful ones as your suspect subconsciously reveals information they did not intend for you to know. This course is very interactive with significant hands-on, statement analysis practice.

Objectives:

- ❖ Recognize valid statements and how to collect them;
- ❖ List the two-step process required for analysis;
- ❖ List the parts of speech that are used during analysis;
- ❖ List the importance of balance in a statement;
- ❖ Identify “Linguistic Signals;”
- ❖ Conduct an analysis of a written statement;
- ❖ Develop a basic ability to interpret the results of an analysis, and;
- ❖ Produce investigative questions derived during analysis.
